

CHECKSTYLE

El reporte CheckStyle valida que el código cumpla con las reglas de estilo y buenas prácticas de programación definidas en el presente proyecto.

Este análisis ayuda a mantener un código limpio y consistente, lo que facilita su mantenimiento y reduce errores a futuro.

Los 3 microservicios presentan las siguientes configuraciones para el archivo de checkstyle:

[src/main/resources/checkstyle.xml](#)

```
<?xml version="1.0" ?>
<!DOCTYPE module PUBLIC
    "-//Checkstyle//DTD Checkstyle Configuration 1.2//EN"
    "https://checkstyle.org/dtds/configuration_1_2.dtd">

<module name="Checker">
    <module name="TreeWalker">
        <module name="PackageName">
            <property name="format"
                value="com.nttdata.transactionservice"/>
        </module>
        <module name="ConstantName"/>
        <module name="LocalFinalVariableName"/>
        <module name="LocalVariableName"/>
        <module name="MemberName"/>
        <module name="MethodName"/>
        <module name="PackageName"/>
        <module name="ParameterName"/>
        <module name="StaticVariableName"/>
        <module name="TypeName"/>
        <module name="IllegalImport"/>
        <module name="UnusedImports"/>
        <module name="RedundantImport"/>
        <module name="MethodLength">
            <property name="max" value="50"/>
        </module>
        <module name="ParameterNumber">
            <property name="max" value="10"/>
        </module>
    </module>
</module>
```

Microservicio de Clientes [customer-service]

```
Run  ✓ customer-service [checkstyle:check] x

>> ■ | ⋮

✓ customer-service [checkstyle:check]: At 29/09/2025 13:38 9 sec, 856 ms
  > ✓ com.nttdata:customer-service:jar:0.0.1-SNAPSHOT 4 sec, 736 ms
